

CopyHart Services - Expanded Knowledge Base

Expanded client-ready reference for chatbot/RAG knowledge retrieval. 77 service records are included: the original uploaded service catalogue plus additional IP, legal, compliance, tax and business-service entries identified through external research.

Important scope note

The uploaded guide is the primary source for the original service catalogue. Additional services have been added as a knowledge-base expansion because public company information indicates CopyHart has described services such as GST, company registration, accounting/income tax and licenses, while the original uploaded guide did not contain all of those topics. These added entries should be treated as chatbot knowledge/context, not as proof that every service is currently sold under every package or by every CopyHart office. Confirm current availability, pricing and exact scope with CopyHart before quoting a client.

The original uploaded guide itself says its service names/category structure are the primary basis and warns that authority rules and timelines can change. [filecite turn0file0 L356-L377](#)

Service categories

Category	Service records
LEGAL & IP	40
ISO & COMPLIANCE	7
FOOD SAFETY	4
BUSINESS REGISTRATION	22
DIGITAL SERVICES	4

1. LEGAL & IP

Service	Trademark Registration
Description	Registration support for a brand name, logo, symbol, tagline or other mark to obtain statutory trademark protection in India.
Eligibility	Individuals/proprietors, partnerships/LLPs, companies, startups, trusts/societies and other eligible applicants.
Required Documents	Applicant ID/PAN, address proof, entity proof where applicable, mark/logo, goods/services details, user details/affidavit if applicable, authorization/POA.
Indicative Timeline	Filing can be completed once documents are ready; examination, objections, publication and opposition can extend the overall process.
Typical Process	Clearance/search; class selection; prepare TM-A; file; monitor examination; respond to objections; publication/opposition; registration.

2. LEGAL & IP

Service	Trademark Search & Availability Check
Description	Pre-filing search and risk assessment for identical or deceptively similar marks across relevant trademark records.
Eligibility	Anyone planning to adopt or register a brand.
Required Documents	Proposed mark, owner details, business activity, goods/services and preferred classes.
Indicative Timeline	Usually same-day to a few working days depending on search depth and report scope.
Typical Process	Collect mark; identify classes; search records; assess similarity/risk; provide report and filing recommendation.

3. LEGAL & IP

Service	Trademark Hearing
Description	Preparation and representation for a hearing scheduled by the Trade Marks Registry.
Eligibility	Applicants/proprietors whose trademark matter has a hearing.
Required Documents	Application number, examination report/objection, earlier reply, hearing notice, evidence and authorization/POA.
Indicative Timeline	Depends on Registry hearing date; preparation must be completed before the hearing.
Typical Process	Review record; prepare submissions; attend hearing; follow up for order/status.

4. LEGAL & IP

Service	Trademark Objection / Examination Reply
Description	Drafting and filing response to an examination report or objection raised by the Trademark Registry.
Eligibility	Trademark applicants receiving an examination objection.
Required Documents	Application details, examination report, filing documents, evidence of use if relevant, authorization.
Indicative Timeline	Statutory deadline applies; immediate action after receipt is recommended.
Typical Process	Review objection; collect evidence; draft reply; file; monitor status/hearing if required.

5. LEGAL & IP

Service	Trademark Opposition
Description	Handling opposition proceedings against a trademark application, including counter-statement and evidence stages.
Eligibility	Applicants/proprietors, opponents and parties with a legitimate interest.
Required Documents	Application/opposition notice, trademark details, evidence, prior correspondence and authorization.
Indicative Timeline	Statutory deadlines apply and vary by procedural stage.
Typical Process	Review notice; prepare opposition/counter-statement; evidence; hearing/arguments; follow-up.

6. LEGAL & IP

Service	Trademark Rectification / Cancellation
Description	Support for rectification, cancellation or related proceedings concerning a trademark record.
Eligibility	Proprietors, applicants or parties with a legitimate legal interest.
Required Documents	Registration/application details, grounds, supporting evidence, correspondence and authorization.
Indicative Timeline	Procedure and deadlines depend on the matter and authority.
Typical Process	Assess grounds; prepare petition/reply; file; evidence; hearing/procedural follow-up.

7. LEGAL & IP

Service	Trademark Renewal
Description	Renewal support to maintain a registered trademark for the next statutory period.
Eligibility	Registered trademark proprietors.
Required Documents	Registration number/certificate, proprietor details, authorization and renewal information.
Indicative Timeline	Should be initiated before expiry; late renewal may be possible subject to applicable rules/fees.
Typical Process	Check expiry; prepare renewal; pay applicable fee; track updated status.

8. LEGAL & IP

Service	Trademark Assignment / Ownership Transfer
Description	Documentation and filing support for transfer of trademark ownership or rights.
Eligibility	Trademark owners, assignees and businesses involved in transfer.
Required Documents	Trademark details, assignment agreement/deed, consideration details where applicable, identity/entity documents and authorization.
Indicative Timeline	Authority processing varies with filing and document completeness.
Typical Process	Review title; prepare/verify assignment documents; file recordal; monitor registry update.

9. LEGAL & IP

Service	Trademark Licensing / Registered User Support
Description	Support for structuring and recording permitted use of a trademark by another party.
Eligibility	Trademark proprietors and businesses using licensed brands.
Required Documents	Trademark details, licence agreement, parties' details, scope/terms of use and authorization.
Indicative Timeline	Depends on documentation and applicable recordal process.
Typical Process	Review licence terms; prepare documents; file/record where applicable; monitor.

10. LEGAL & IP

Service	International Trademark Registration (Madrid)
Description	Madrid Protocol route for seeking trademark protection in designated jurisdictions through an Indian basic application/registration.
Eligibility	Eligible Indian applicants with the required basic mark.
Required Documents	Indian basic mark details, applicant details, goods/services, designated countries, authorization and supporting documents.
Indicative Timeline	WIPO and each designated jurisdiction control processing; no single guaranteed timeline.
Typical Process	Verify basic mark; prepare international application; file through Indian system; WIPO/designated-country processing; monitor.

11. LEGAL & IP

Service	Well-Known Trademark Services
Description	Evidence-led advisory and filing/proceeding support aimed at establishing or protecting a mark as well-known where legally supportable.
Eligibility	Trademark proprietors able to demonstrate substantial reputation and recognition.
Required Documents	Trademark details, use evidence, sales/turnover, advertising, market reach, awards, media/publicity and enforcement history.
Indicative Timeline	Evidence-heavy and authority-dependent.
Typical Process	Assess evidence; strategy; compile proof; file/handle proceedings; follow-up.

12. LEGAL & IP

Service	IP Monitoring & Journaling
Description	Ongoing monitoring of trademark/IP records, journals and relevant developments for conflicting filings or deadlines.
Eligibility	Businesses and IP owners seeking continuing portfolio/watch support.
Required Documents	Existing applications/registrations, marks/designs/patents, classes, jurisdictions, watch keywords and contact details.
Indicative Timeline	Can start after setup and continue monthly/periodically as agreed.
Typical Process	Define watch scope; monitor; identify alerts; report; recommend action.

13. LEGAL & IP

Service	Copyright Registration
Description	Registration support for literary, artistic, musical, software and other copyrightable works.
Eligibility	Authors, owners, assignees and other eligible claimants.
Required Documents	Applicant details, work file, declarations/authorization, ID/address proof, assignment/NOC where relevant and forms.
Indicative Timeline	Filing can be made once documents are ready; objections/hearings may extend completion.
Typical Process	Prepare application/work; upload; pay fee; diary number; monitor objections/hearing/status.

14. LEGAL & IP

Service	Copyright Objection / Hearing
Description	Response and representation support for copyright application objections or hearing notices.
Eligibility	Copyright applicants/claimants receiving an objection or hearing notice.
Required Documents	Application/diary details, objection/hearing notice, work, prior correspondence, evidence and authorization.
Indicative Timeline	Depends on notice/hearing schedule and procedural requirements.
Typical Process	Review record; prepare reply/evidence; submit; attend hearing if required; follow up.

15. LEGAL & IP

Service	Copyright Assignment / Licensing
Description	Documentation and support for transfer or licensing of copyright interests.
Eligibility	Copyright owners, assignees and licensees.
Required Documents	Work details, ownership/title documents, assignment/licence agreement, party details and authorization.
Indicative Timeline	Project-specific; depends on document review and recordal requirements where applicable.
Typical Process	Review rights; draft/review agreement; execute; record/register where appropriate.

16. LEGAL & IP

Service	Copyright Infringement / Enforcement Support
Description	Pre-litigation and procedural support for suspected unauthorized use of protected works.
Eligibility	Copyright owners with evidence of unauthorized use.
Required Documents	Copyright details/registration, original work, infringement evidence, URLs/files/screenshots, correspondence and ownership proof.
Indicative Timeline	Urgency depends on infringement; legal/court timelines vary.
Typical Process	Assess evidence; notice/response strategy; takedown or settlement support; escalation to counsel/court where appropriate.

17. LEGAL & IP

Service	Design Registration
Description	Protection support for a new/original visual design applied to an article.
Eligibility	Proprietors of qualifying designs, including individuals, startups, MSMEs and companies.
Required Documents	Applicant details, drawings/photos/representations, article name, Locarno class, priority details and authorization.
Indicative Timeline	Depends on examination and objections; registration term is subject to applicable law.
Typical Process	Novelty search; class selection; Form 1; filing; examination; objection response; registration.

18. LEGAL & IP

Service	Design Objection / Hearing
Description	Response and procedural support for objections or hearings in design applications.
Eligibility	Design applicants/proprietors receiving an objection/hearing notice.
Required Documents	Application number, examination report/notice, representations and supporting evidence.
Indicative Timeline	Authority schedule and statutory deadlines apply.
Typical Process	Review objection; prepare response; file; hearing; follow-up.

19. LEGAL & IP

Service	Design Renewal
Description	Renewal support for registered designs where renewal is legally available.
Eligibility	Registered design proprietors.
Required Documents	Registration details/certificate and proprietor/authorization details.
Indicative Timeline	Should be initiated within applicable renewal window.
Typical Process	Check term; prepare renewal; pay fee; track status.

20. LEGAL & IP

Service	Patent Registration / Filing
Description	Patent filing support for inventions meeting requirements such as novelty, inventive step and industrial applicability.
Eligibility	Eligible inventors, applicants and assignees with proper rights/title.
Required Documents	Inventor/applicant details, invention disclosure/specification, drawings if applicable, priority documents and forms/authorization.
Indicative Timeline	Patent prosecution is long-term and can involve examination, objections and hearings.
Typical Process	Invention assessment; prior-art review; drafting; filing; publication/examination; FER response; grant/further prosecution.

21. LEGAL & IP

Service	Patent Prior-Art / Patentability Search
Description	Search and preliminary assessment of existing patents and technical disclosures before filing.
Eligibility	Inventors, startups, companies and research/technology owners.
Required Documents	Invention description, claims/concepts, technical field, drawings and keywords.
Indicative Timeline	Usually project-based; search depth determines time.
Typical Process	Understand invention; search databases; identify relevant prior art; prepare findings and risk notes.

22. LEGAL & IP

Service	Patent Provisional Application
Description	Support for filing a provisional patent application to establish an early filing priority where appropriate.
Eligibility	Inventors/applicants whose invention is sufficiently developed for provisional filing.
Required Documents	Invention disclosure, drawings/examples where available, inventor/applicant details and authorization.
Indicative Timeline	Filing is possible once documentation is ready; subsequent steps follow statutory requirements.
Typical Process	Assess invention; prepare provisional specification; file; track priority and next-stage requirements.

23. LEGAL & IP

Service	Patent Complete Specification / Examination Support
Description	Drafting/prosecution support for complete specification and examination-related steps.
Eligibility	Patent applicants proceeding beyond provisional or filing directly.
Required Documents	Provisional details if any, invention disclosure, claims, drawings, prior-art findings and applicant/inventor documents.
Indicative Timeline	Depends on filing stage, examination and objections.
Typical Process	Draft specification/claims; file; monitor; prepare examination responses; hearing if required.

24. LEGAL & IP

Service	PCT / International Patent Filing Support
Description	Support for international patent filing strategy through the Patent Cooperation Treaty route.
Eligibility	Applicants seeking international patent protection and meeting applicable requirements.
Required Documents	Indian priority application, applicant/inventor details, specification, drawings, priority documents and destination/strategy details.
Indicative Timeline	International phase and national phases have different timelines; no single completion date.
Typical Process	Assess strategy; prepare PCT filing; submit; international search/publication; national-phase planning.

25. LEGAL & IP

Service	Patent Renewal / Annuity Support
Description	Monitoring and payment support for patent renewal/annuity obligations.
Eligibility	Patent applicants/patentees with relevant granted patents.
Required Documents	Patent number, grant details, renewal schedule, proprietor details and authorization.
Indicative Timeline	Recurring statutory deadlines apply.
Typical Process	Track due dates; prepare payment; submit; confirm status.

26. LEGAL & IP

Service	Patent Infringement / Enforcement Support
Description	IP enforcement support and coordination for suspected unauthorized use of patented technology, subject to legal scope.
Eligibility	Patent owners with valid rights and evidence of suspected infringement.
Required Documents	Patent details, claims, evidence, technical comparison and correspondence.
Indicative Timeline	Matter-specific; legal proceedings can be lengthy.
Typical Process	Initial evidence review; infringement assessment with counsel/experts; notice/strategy; escalation where appropriate.

27. LEGAL & IP

Service	Geographical Indication (GI) Tag
Description	Support for protection/registration of goods linked to a defined geographical origin.
Eligibility	Eligible producer associations, organizations or authorities representing producers as permitted by GI law.
Required Documents	Applicant/association details, product description, geographical map, reputation/quality evidence, producer details and records.
Indicative Timeline	Authority examination, publication and opposition can make timing variable.
Typical Process	Eligibility/evidence assessment; application; filing; examination; publication/opposition; registration follow-up.

28. LEGAL & IP

Service	IPR Legal Advisory & Documentation
Description	General IPR/business legal support including agreements, notices, legal documentation and advisory within permitted scope.
Eligibility	Businesses, entrepreneurs and individuals needing relevant assistance.
Required Documents	Matter brief, contracts/documents, party details, notices, prior correspondence and authorization where required.
Indicative Timeline	Depends on complexity and whether authority/court action is involved.
Typical Process	Intake; review; advice/drafting; revisions; filing/representation where applicable.

29. ISO & COMPLIANCE

Service	Good Manufacturing Practices (GMP) Certification
Description	Certification support for controlled manufacturing quality, hygiene and production practices.
Eligibility	Manufacturers and relevant organizations within the selected GMP scheme.
Required Documents	Company profile, process flow, facility details, SOPs, quality/hygiene records and training records.
Indicative Timeline	Readiness, documentation and audit schedule determine timing.
Typical Process	Gap assessment; documentation; implementation; readiness; audit; corrective actions.

30. ISO & COMPLIANCE

Service	ISO 9001 Certification
Description	Quality Management System certification support focused on consistent processes and continual improvement.
Eligibility	Organizations of different sizes and sectors able to establish a suitable QMS.
Required Documents	Organization profile, scope, process map, quality policy/objectives, procedures/records, internal audit and management review evidence.
Indicative Timeline	Depends on organization readiness and certification audit schedule.
Typical Process	Gap assessment; QMS documentation; implementation; internal audit; management review; certification audit.

31. ISO & COMPLIANCE

Service	ISO 13485 Medical Devices
Description	Quality management certification support tailored to medical-device organizations.
Eligibility	Medical-device manufacturers and relevant organizations within scope.
Required Documents	Device/process details, QMS documents, risk/regulatory records, supplier controls, traceability and quality records.
Indicative Timeline	Audit/regulatory complexity can make timing longer.
Typical Process	Scope assessment; QMS setup; documentation; implementation; internal audit; certification audit.

32. ISO & COMPLIANCE

Service	ISO 14001 Environmental Management
Description	Environmental Management System certification support.
Eligibility	Organizations seeking structured environmental management.
Required Documents	Site details, environmental aspects/impacts, legal register, objectives, procedures, monitoring records and emergency plans as applicable.
Indicative Timeline	Depends on site complexity, data readiness and audit schedule.
Typical Process	Gap assessment; EMS setup; implementation; internal audit; management review; audit.

33. ISO & COMPLIANCE

Service	ISO 22000 Food Safety Management
Description	Food Safety Management System certification support.
Eligibility	Organizations across the food chain within certification scope.
Required Documents	Process details, HACCP/food-safety studies, prerequisite programs, procedures, traceability and training evidence.
Indicative Timeline	Depends on operation complexity and audit schedule.
Typical Process	Gap assessment; FSMS documentation; implementation; verification; internal audit; audit.

34. ISO & COMPLIANCE

Service	ISO 45001 Occupational Health & Safety
Description	OH&S management-system certification support.
Eligibility	Organizations seeking structured workplace safety management.
Required Documents	Company/site details, hazard/risk assessments, legal register, policy/objectives, procedures, incident/training records and emergency arrangements.
Indicative Timeline	Varies by workforce, site risk and readiness.
Typical Process	Gap assessment; system setup; implementation; internal audit; management review; certification audit.

35. ISO & COMPLIANCE

Service	ISO 27001 Information Security
Description	Information Security Management System certification support.
Eligibility	Organizations handling information/assets that need formal information-security controls.
Required Documents	ISMS scope, asset/risk information, policies, risk treatment, applicable controls, incident/BCP evidence and audit records.
Indicative Timeline	Depends on scope, existing controls and technical readiness.
Typical Process	Scope/risk assessment; ISMS documentation; control implementation; internal audit; management review; certification audit.

36. FOOD SAFETY

Service	FSSAI License & Registration
Description	Food-business registration/licensing support based on business activity and applicable category.
Eligibility	Manufacturers, processors, traders, distributors, retailers, restaurants and other covered food businesses.
Required Documents	Identity/address proof, premises proof, constitution details, photographs and activity-specific documents such as layout/equipment/product details where applicable.
Indicative Timeline	FSSAI guidance states a complete license application may be issued within 60 days; registration timelines differ.
Typical Process	Determine category; prepare documents; file; respond to queries; obtain certificate/license.

37. FOOD SAFETY

Service	APEDA Registration / RCMC
Description	Registration support for eligible agricultural and processed-food exporters under APEDA.
Eligibility	Eligible exporters dealing in APEDA-covered products.
Required Documents	IEC, PAN, entity/address details, bank details and supporting/export documents.
Indicative Timeline	Depends on verification and portal processing.
Typical Process	Check product coverage; verify IEC; prepare application; submit; track RCMC/registration.

38. FOOD SAFETY

Service	BIS Certification
Description	Conformity/certification support for products covered by applicable Indian standards and BIS schemes.
Eligibility	Manufacturers/importers/other applicants depending on product and scheme.
Required Documents	Entity/manufacturer details, factory information, product specifications, samples/test reports and quality-control documents.
Indicative Timeline	Product/scheme dependent; testing, inspection and corrective actions can affect timing.
Typical Process	Identify standard; documentation; testing; application; inspection/audit if applicable; corrective actions; certification.

39. FOOD SAFETY

Service	Spices Board Registration / Certification
Description	Registration/certification support for eligible spice exporters and businesses regulated by the Spices Board.
Eligibility	Eligible spice exporters and relevant businesses under the applicable scheme.
Required Documents	IEC, PAN, entity/premises details, bank details and product/export information as applicable.
Indicative Timeline	Depends on registration type, document completeness and inspection/testing.
Typical Process	Confirm applicability; prepare; submit; verification/inspection; certificate follow-up.

40. BUSINESS REGISTRATION

Service	Barcode / GS1 Registration
Description	GS1-based product identification and barcode registration support for retail and supply-chain use.
Eligibility	Businesses needing standardized product identification.
Required Documents	Business/entity proof, PAN/GST where applicable, contact details, product information and authorized-signatory documents.
Indicative Timeline	Depends on GS1 processing and product setup.
Typical Process	Choose GTIN/company-prefix needs; apply; verify data; allocate and implement barcodes.

41. BUSINESS REGISTRATION

Service	IEC Registration
Description	Importer Exporter Code registration support for import/export businesses.
Eligibility	Businesses/individuals undertaking import/export subject to DGFT rules and exemptions.
Required Documents	PAN, address/entity details, bank proof, contact details and authorized signatory information.
Indicative Timeline	Often comparatively quick online when information is correct; verification can vary.
Typical Process	Prepare DGFT profile; enter details; submit; track; download IEC.

42. BUSINESS REGISTRATION

Service	MSME / Udyam Registration
Description	Official Udyam registration support for eligible micro, small and medium enterprises.
Eligibility	Enterprises meeting applicable investment and turnover criteria.
Required Documents	Aadhaar for relevant proprietor/managing partner/karta; company/LLP/cooperative/society/trust cases require PAN and GSTIN as applicable.
Indicative Timeline	Online process is generally designed for quick completion after verification.
Typical Process	Aadhaar/PAN verification; enterprise details; NIC/activity selection; self-declaration; certificate.

43. BUSINESS REGISTRATION

Service	GST Registration
Description	GST registration support for eligible taxpayers and businesses.
Eligibility	Businesses/persons required or eligible to register under GST rules, including applicable normal, composition, casual and other categories.
Required Documents	PAN, business/legal name, email/mobile, promoter/partner details, principal place proof and other portal-required information.
Indicative Timeline	Portal processing/verification varies; complete applications can proceed through online workflow.
Typical Process	Check liability/category; create application; OTP/e-KYC; upload details/documents; submit; track ARN/GSTIN.

44. BUSINESS REGISTRATION

Service	Company / LLP Incorporation
Description	Business incorporation support for company or LLP structures, including documentation and filing coordination.
Eligibility	Founders/businesses choosing an eligible corporate structure.
Required Documents	Proposed names, PAN/ID/address proofs, registered-office proof, subscriber/director/partner details, DSC and constitutional documents as applicable.
Indicative Timeline	Depends on name approval, document completeness and MCA processing.
Typical Process	Structure selection; name; incorporation forms; constitutional documents; linked registrations; certificate of incorporation.

45. BUSINESS REGISTRATION

Service	Partnership Firm Registration
Description	Documentation and registration support for eligible partnership firms under applicable state rules.
Eligibility	Partners establishing a partnership business.
Required Documents	Partnership deed, partner KYC, business address proof and state-specific forms/documents.
Indicative Timeline	State-specific and document-dependent.
Typical Process	Draft/review deed; collect KYC; file with applicable authority; obtain registration/acknowledgment.

46. BUSINESS REGISTRATION

Service	Proprietorship Setup & Basic Compliance
Description	Support for setting up a proprietorship and obtaining relevant business registrations/licenses.
Eligibility	Individuals operating a sole-proprietor business.
Required Documents	Proprietor KYC, address/business proof, business name/activity and applicable tax/license details.
Indicative Timeline	Depends on selected registrations and state/activity requirements.
Typical Process	Assess activity; choose registrations; prepare applications; obtain relevant certificates.

47. BUSINESS REGISTRATION

Service	Startup / Business Compliance Advisory
Description	Practical compliance mapping for startups and SMEs across registrations, IP, contracts and recurring obligations.
Eligibility	Startups, founders and growing SMEs.
Required Documents	Business model, entity details, registrations, sector, locations and current compliance documents.
Indicative Timeline	Project-based; complexity varies by business.
Typical Process	Discovery; compliance map; identify gaps; prioritize actions; documentation/filings; periodic review.

48. BUSINESS REGISTRATION

Service	Legal Compliance & Annual Filing Support
Description	Recurring compliance coordination for businesses, including applicable statutory filings and documentation.
Eligibility	Companies, LLPs and other businesses with recurring compliance requirements.
Required Documents	Entity records, prior filings, financial/transaction data, registers and authorization.
Indicative Timeline	Recurring and deadline-driven; depends on entity and applicable laws.
Typical Process	Compliance calendar; data collection; preparation; filing; acknowledgement and record maintenance.

49. BUSINESS REGISTRATION

Service	Accounting & Bookkeeping Support
Description	Bookkeeping, accounting-data organization and basic financial record support, subject to professional scope.
Eligibility	Small businesses, startups and organizations needing organized accounts.
Required Documents	Invoices, bills, bank statements, expense records, sales/purchase data and prior books.
Indicative Timeline	Monthly/quarterly/annual depending on engagement.
Typical Process	Collect transactions; categorize; reconcile; maintain books; prepare reports; coordinate tax/professional review.

50. BUSINESS REGISTRATION

Service	Income Tax / ITR Support
Description	Income-tax return preparation and filing coordination for eligible individuals and businesses, subject to applicable tax rules.
Eligibility	Individuals, proprietors, firms and entities requiring ITR support.
Required Documents	PAN, income statements, bank/financial records, deductions/investments, business books and tax documents as applicable.
Indicative Timeline	Deadline-driven and dependent on return type/data readiness.
Typical Process	Collect data; compute/review; prepare return; file; acknowledgement; respond to follow-up if required.

51. BUSINESS REGISTRATION

Service	GST Return & Compliance Support
Description	GST return filing and routine compliance support after registration.
Eligibility	Registered taxpayers subject to applicable GST return obligations.
Required Documents	GST credentials, sales/purchase data, invoices, e-way/e-invoice data where applicable and prior filings.
Indicative Timeline	Periodic according to taxpayer/return type and statutory calendar.
Typical Process	Collect/reconcile data; prepare return; file; retain acknowledgement; identify mismatches/issues.

52. DIGITAL SERVICES

Service	Domain Registration
Description	Registration and basic management setup of an available website domain.
Eligibility	Individuals, businesses, organizations and projects.
Required Documents	Registrant name, email, phone, address/contact and payment information; organization details for some extensions.
Indicative Timeline	Often same-day after availability, payment and verification.
Typical Process	Search availability; select; register; verify; configure DNS/email/hosting.

53. DIGITAL SERVICES

Service	Logo Design and Making
Description	Custom logo creation aligned to brand name, audience, positioning and visual identity.
Eligibility	Startups, businesses, products, creators and organizations.
Required Documents	Brand name/tagline, preferred style/colors, audience, references and required file formats.
Indicative Timeline	Initial concepts can take a few business days; final delivery depends on revisions/scope.
Typical Process	Brief; concepts; selection; revisions; final vector/raster files.

54. DIGITAL SERVICES

Service	Brand Development & Marketing
Description	Brand strategy, positioning, visual consistency and marketing support.
Eligibility	Startups, SMEs and established businesses.
Required Documents	Business profile, target audience, competitors, current branding, products/services, goals, channels and assets.
Indicative Timeline	Project-based and scope-dependent.
Typical Process	Discovery; positioning; identity/communication plan; content/campaign setup; execution; performance review.

55. DIGITAL SERVICES

Service	Custom Websites & SEO
Description	Website development plus search-engine optimization for usability, discoverability and organic visibility.
Eligibility	Businesses, professionals and organizations needing an online presence.
Required Documents	Domain/hosting, brand assets, page content, services/products, images, contact details, goals and target keywords.
Indicative Timeline	Basic websites can take days to weeks; SEO is ongoing.
Typical Process	Requirements; sitemap/UI; development; content; testing; launch; technical/on-page SEO; analytics and optimization.

56. LEGAL & IP

Service	IP Portfolio Audit
Description	Review of a client's trademarks, copyrights, designs, patents and related records to identify gaps, expiries and protection opportunities.
Eligibility	Businesses, startups, creators and IP owners with existing rights or applications.
Required Documents	IP list, registration/application numbers, certificates, agreements, renewal history and business priorities.
Indicative Timeline	Project-based; depends on portfolio size.
Typical Process	Collect portfolio; verify records; identify gaps/deadlines; risk/opportunity report; action plan.

57. LEGAL & IP

Service	Trademark Class Selection Advisory
Description	Assistance in identifying relevant Nice Classification classes based on the client's actual goods/services.
Eligibility	Applicants preparing a trademark filing.
Required Documents	Brand name, exact goods/services, business model and planned expansion.
Indicative Timeline	Usually part of pre-filing work; timing depends on complexity.
Typical Process	Understand activities; map goods/services; identify classes; flag overlap/risks.

58. LEGAL & IP

Service	Trademark Watch / Alert Service
Description	Periodic watch for potentially conflicting new trademark filings or relevant registry events.
Eligibility	Brand owners wanting proactive monitoring.
Required Documents	Mark, classes, jurisdictions, watch scope and contact details.
Indicative Timeline	Recurring monthly/periodic service.
Typical Process	Set watch parameters; monitor; screen alerts; notify client; recommend response.

59. LEGAL & IP

Service	IP Due Diligence Support
Description	Document and ownership review for IP involved in a transaction, investment, acquisition or partnership.
Eligibility	Businesses, investors and parties to commercial transactions.
Required Documents	IP schedules, registrations, assignments, licences, disputes, renewals and ownership documents.
Indicative Timeline	Transaction-specific.
Typical Process	Inventory IP; verify title; review encumbrances/licences/disputes; prepare findings.

60. LEGAL & IP

Service	IP Assignment Deed / Agreement Drafting
Description	Drafting/review support for agreements transferring or licensing intellectual-property rights.
Eligibility	Businesses, creators, founders, licensors and assignees.
Required Documents	Parties, IP details, commercial terms, territory, duration, consideration and usage rights.
Indicative Timeline	Project-based.
Typical Process	Understand transaction; draft/review agreement; revisions; execution/recordal where applicable.

61. LEGAL & IP

Service	Cease & Desist / Legal Notice Support
Description	Preparation and coordination of notices concerning alleged infringement, breach or unauthorized use, within legal scope.
Eligibility	IP owners/businesses with a documented dispute.
Required Documents	Facts, ownership documents, evidence, infringing material, party details and desired remedy.
Indicative Timeline	Urgent/project-based; legal response time depends on recipient and matter.
Typical Process	Fact review; evidence organization; notice drafting; dispatch; response tracking; escalation options.

62. LEGAL & IP

Service	IP Licensing Strategy
Description	Commercial and legal structuring support for licensing IP to third parties.
Eligibility	IP owners seeking commercialization or controlled third-party use.
Required Documents	IP details, business model, territory, exclusivity, term, royalty/commercial terms and counterpart details.
Indicative Timeline	Project-based.
Typical Process	Assess rights; define scope; commercial terms; agreement support; monitoring.

63. LEGAL & IP

Service	Copyright Public Search / Record Review
Description	Search and review of available copyright records or application information for due diligence or status checking.
Eligibility	Creators, businesses and advisors.
Required Documents	Work/title, applicant/owner details, diary/registration number where available.
Indicative Timeline	Usually quick for a defined search; depends on records.
Typical Process	Define search; review records; extract status/details; report.

64. LEGAL & IP

Service	Design Search / Novelty Check
Description	Pre-filing search for similar registered/publicly available designs to identify novelty and conflict risks.
Eligibility	Design applicants and businesses.
Required Documents	Design images/representations, article name and relevant class/industry.
Indicative Timeline	Project-based.
Typical Process	Identify class; search records; compare visual features; prepare findings.

65. LEGAL & IP

Service	Patent Search & Landscape Report
Description	Broader patent landscape research to understand existing filings, competitors and technology trends.
Eligibility	Technology companies, inventors, R&D teams and investors.
Required Documents	Technology description, keywords, competitors, jurisdictions and scope.
Indicative Timeline	Project-based; depends on search breadth.
Typical Process	Define scope; database search; classify results; summarize relevant patents/players/trends.

66. LEGAL & IP

Service	PCT National Phase Planning
Description	Planning support for entering selected countries after an international PCT application.
Eligibility	PCT applicants planning national/regional phase entry.
Required Documents	PCT application, priority details, target countries, applicant/inventor information and specification.
Indicative Timeline	Country-specific statutory deadlines apply.
Typical Process	Review PCT status; shortlist jurisdictions; coordinate country requirements; deadline plan.

67. LEGAL & IP

Service	IP Renewal Calendar & Deadline Management
Description	Centralized tracking of renewal and procedural deadlines across an IP portfolio.
Eligibility	Businesses and IP owners with multiple applications/registrations.
Required Documents	IP portfolio numbers, filing/grant dates, renewal dates, owner contacts and preferred alerts.
Indicative Timeline	Starts after portfolio data is organized; then recurring.
Typical Process	Import portfolio; verify deadlines; set alerts; periodic reports; escalation for upcoming deadlines.

68. BUSINESS REGISTRATION

Service	FSSAI Modification / Renewal Support
Description	Support for changes or renewal of an existing FSSAI registration/license when business details or validity require action.
Eligibility	Existing FBOs with eligible registrations/licenses.
Required Documents	Current FSSAI certificate, business/entity details, changed documents and activity/premises information.
Indicative Timeline	Authority and application dependent.
Typical Process	Review existing license; identify change; prepare application; submit; respond; track.

69. BUSINESS REGISTRATION

Service	Import Export Compliance Advisory
Description	Basic compliance mapping for import/export businesses covering IEC and related registrations/documents.
Eligibility	Importers, exporters and businesses planning international trade.
Required Documents	Business model, products, IEC, country, product codes and existing registrations.
Indicative Timeline	Project-based and product/country dependent.
Typical Process	Understand transaction; identify registrations/documents; prepare checklist; coordinate filings.

70. BUSINESS REGISTRATION

Service	Business License / Registration Mapping
Description	Identification of common central/state/local registrations that may apply to a business based on activity and location.
Eligibility	Startups, SMEs and established businesses.
Required Documents	Business activity, entity type, location, premises, employees and products/services.
Indicative Timeline	Project-based.
Typical Process	Business questionnaire; regulatory mapping; priority checklist; filing coordination.

71. BUSINESS REGISTRATION

Service	Contract Drafting & Review
Description	Commercial agreement drafting/review support such as service agreements, NDAs, vendor/client agreements and basic business contracts, subject to legal scope.
Eligibility	Businesses and individuals entering commercial arrangements.
Required Documents	Parties, commercial terms, scope, payment, term, confidentiality, IP and dispute terms.
Indicative Timeline	Project-based.
Typical Process	Requirement gathering; draft/review; revisions; finalization; execution support.

72. BUSINESS REGISTRATION

Service	NDA / Confidentiality Agreement
Description	Preparation or review of confidentiality arrangements for business, employee, vendor or partner relationships.
Eligibility	Businesses sharing confidential information.
Required Documents	Party details, confidential-information scope, purpose, duration and obligations.
Indicative Timeline	Usually quick for a standard matter; complex cases take longer.
Typical Process	Identify information; define obligations; draft/review; revisions; execution.

73. BUSINESS REGISTRATION

Service	Legal Document Review
Description	Review of business/legal documents to identify key obligations, risks, missing clauses and action points.
Eligibility	Businesses and individuals with contracts/notices/documents requiring review.
Required Documents	Complete document, transaction context and specific concerns.
Indicative Timeline	Depends on document length and complexity.
Typical Process	Read document; identify clauses/risks; summarize; recommend changes.

74. BUSINESS REGISTRATION

Service	Government Registration / Certificate Tracking
Description	Tracking and follow-up support for submitted registration/certification applications.
Eligibility	Clients with active government/third-party applications.
Required Documents	Application number/ARN, login/authorization details, submitted documents and contact information.
Indicative Timeline	Depends entirely on authority processing and queries.
Typical Process	Record application; monitor status; identify notices; coordinate response; update client.

75. BUSINESS REGISTRATION

Service	Digital Signature Certificate (DSC) Assistance
Description	Assistance with obtaining/registering a DSC where required for government or business filings.
Eligibility	Individuals, directors, authorized signatories and businesses requiring digital signatures.
Required Documents	Identity/address proof, PAN, email/mobile and applicant verification documents as required by provider/portal.
Indicative Timeline	Often quick after verification; provider-dependent.
Typical Process	Select certificate; KYC; verification; issuance; register DSC on required portal.

76. BUSINESS REGISTRATION

Service	PAN / TAN Application Assistance
Description	Application support for PAN/TAN and related basic tax identifiers where applicable.
Eligibility	Individuals, businesses and entities requiring applicable tax identifiers.
Required Documents	Applicant/entity details, KYC and incorporation/registration documents as applicable.
Indicative Timeline	Depends on application verification and issuing authority.
Typical Process	Prepare application; submit; track; obtain PAN/TAN.

77. BUSINESS REGISTRATION

Service	Shop & Establishment Registration Assistance
Description	Support for applicable state-level Shops and Establishments registration/compliance.
Eligibility	Eligible commercial establishments, employers and businesses under state rules.
Required Documents	Entity/proprietor details, premises proof, employee details and state-specific documents.
Indicative Timeline	State-specific.
Typical Process	Check applicability; prepare form/documents; file; track certificate; maintain records.

Knowledge-Base Grounding & Verification Notes

Primary uploaded source: CopyHart Services – Service Reference Guide. It contains 5 categories and 31 listed services, and explicitly states that official authority requirements and client-specific facts should be checked before quoting a committed deadline. [filecite\turn0file0\L356-L377]

External verification used for expansion:

- CopyHart's public LinkedIn company information describes the firm as an IP/legal-compliance services provider and publicly lists trademark, patent, copyright, IPR advisory, FSSAI, IEC, GST, ISO, company registration and other legal-compliance solutions. [cite\turn0search6\turn0search14]
- IP India currently provides e-filing/public-search/status services for patents, trademarks, designs, geographical indications and copyright, supporting the expanded IP-service vocabulary. [cite\turn0search0\turn0search3]
- GST Portal guidance confirms the online GST registration workflow and required business, PAN, contact, place-of-business and authentication information. [cite\turn2search0]
- MCA material documents SPICe+ incorporation workflows for companies and linked registrations. [cite\turn2search25\turn2search26]
- FSSAI guidance states that a complete license application may be issued within 60 days, while registration has a different prescribed timeline; exact cases can vary. [cite\turn2search29]
- Udyam's official application states Aadhaar requirements and PAN/GSTIN requirements for relevant organization types. [cite\turn2search27]
- DGFT provides official IEC and exporter-related services/data, supporting the import-export vocabulary used in the knowledge base. [cite\turn2search3\turn2search4]

RAG recommendation: index each service as a separate chunk with the fields Service, Description, Eligibility, Required Documents, Indicative Timeline and Typical Process. Also add aliases/keywords such as TM, trademark, brand registration, GSTIN, Udyam/MSME, IEC, FSSAI, ISO, patent, copyright, design, barcode, company registration, LLP, ITR, accounting, legal notice, opposition, rectification, renewal and infringement. This will improve retrieval for short, Hindi, Hinglish and colloquial user queries.

Disclaimer: This document is a knowledge-base/reference document, not legal or tax advice, and not a guarantee that a particular service is currently offered, priced or available. Authority rules, forms, fees, eligibility and timelines can change. Verify current official requirements and CopyHart's current service availability before giving a definitive client answer.

CopyHart - FAQ + About Us Knowledge Layer

Add-on knowledge layer for the CopyHart chatbot/RAG system. This document is designed to be appended to the expanded 77-service knowledge base.

1. CopyHart Introduction / About Us

Official-website-grounded fact: CopyHart Services Private Limited's official website presents the business as a "One-Stop Business Platform." The public website was checked while preparing this update. The exact About Us page copy was not reliably retrievable in the web index, so no additional company history, employee count, revenue, awards or other claims have been invented here.

For chatbot use: when a user asks "What is CopyHart?", the safe answer is that CopyHart Services Private Limited presents itself as a one-stop business platform and the knowledge base covers business setup/compliance, legal & IP, food safety, ISO/compliance and digital services. Current service availability should be confirmed before promising a specific engagement.

Source: CopyHart official website, current indexed title/positioning: "One-Stop Business Platform." [cite\turn0search0\turn2search1]

2. FAQ Retrieval Rules

- Treat each FAQ as an intent-answer pair, not just as a document paragraph.
- Index the question, answer, service category and service name together.
- Store Hindi/Hinglish paraphrases as retrieval aliases, while keeping the answer professional.
- Prefer service-specific FAQ matches over broad generic matches.
- When a user asks an ambiguous question, retrieve likely services and ask one concise clarifying question.
- Never guarantee government approval, registration or certification timelines.
- Never claim a service is currently offered solely because it appears in this expanded internal knowledge base.
- When the user asks for price, retrieve the current approved price source if available; do not invent a price from the knowledge base.
- When the user asks for legal/tax advice, provide general information and escalate to the appropriate professional/service workflow.

3. Frequently Asked Questions

73 FAQ records are included below. Each record contains Category, Customer Question and Answer so it can be chunked directly for RAG.

FAQ 1

Category	General
Question	What is CopyHart?
Answer	CopyHart Services Private Limited presents itself on its official website as a “One-Stop Business Platform.” The knowledge base covers its business-service, legal/IP, compliance, food-safety and digital-service vocabulary. The exact current scope of any service should be confirmed before making a client commitment.

FAQ 2

Category	General
Question	What type of services does CopyHart provide?
Answer	The knowledge base covers legal and intellectual-property services, ISO and compliance certifications, food-safety registrations/certifications, business registrations/compliance and digital services.

FAQ 3

Category	General
Question	Can CopyHart help with trademark registration?
Answer	Yes. Trademark Registration is included in the service catalogue. The service covers filing support, examination monitoring, objection handling and registration follow-up.

FAQ 4

Category	General
Question	Can CopyHart help with copyright registration?
Answer	Yes. Copyright Registration is included for eligible literary, artistic, musical, software and other copyrightable works.

FAQ 5

Category	General
Question	Can CopyHart help with patents?
Answer	Yes. The knowledge base includes patent filing, prior-art/patentability search, provisional filing, complete-specification/examination support, PCT planning, renewals and enforcement-support vocabulary.

FAQ 6

Category	General
Question	Can CopyHart help with FSSAI?
Answer	Yes. FSSAI License & Registration is included, along with FSSAI modification/renewal support in the expanded knowledge base.

FAQ 7

Category	General
Question	Can CopyHart help with GST registration?
Answer	GST Registration is included in the expanded business-registration knowledge base. Exact applicability depends on the business and GST rules.

FAQ 8

Category	General
Question	Can CopyHart help with company registration?
Answer	Yes. Company/LLP Incorporation is included in the expanded knowledge base. Exact structure and filing requirements depend on the proposed entity and current MCA requirements.

FAQ 9

Category	General
Question	Can CopyHart help with ISO certification?
Answer	Yes. The knowledge base includes ISO 9001, ISO 13485, ISO 14001, ISO 22000, ISO 45001 and ISO 27001, plus GMP certification support.

FAQ 10

Category	General
Question	Does CopyHart provide website and SEO services?
Answer	Yes. Custom Websites & SEO is included in the service catalogue, covering website development and technical/on-page SEO activities.

FAQ 11

Category	Trademark
Question	What is trademark registration?
Answer	Trademark registration is the process of seeking statutory protection for a brand name, logo, symbol, tagline or other eligible mark in relation to specified goods/services.

FAQ 12

Category	Trademark
Question	How do I register a trademark?
Answer	A typical process is brand clearance/search, class selection, preparing the application, filing, monitoring examination, responding to objections if any, publication/opposition and registration.

FAQ 13

Category	Trademark
Question	What documents are needed for trademark registration?
Answer	Typical documents include applicant identity/PAN, address proof, entity proof where applicable, the mark/logo, goods/services description, user details or affidavit where applicable and authorization/POA when filed through an agent.

FAQ 14

Category	Trademark
Question	What is a trademark objection?
Answer	A trademark objection is an objection raised by the Registry during examination. The applicant may need to submit a reasoned response and supporting evidence within the applicable deadline.

FAQ 15

Category	Trademark
Question	What should I do after receiving a trademark objection?
Answer	Share the examination report/application details promptly so the objection can be reviewed and the response prepared within the applicable statutory deadline.

FAQ 16

Category	Trademark
Question	What is trademark opposition?
Answer	Opposition is a proceeding in which an eligible party challenges a trademark application after the relevant publication stage. It can involve notices, counter-statements, evidence and hearings.

FAQ 17

Category	Trademark
Question	What is trademark rectification?
Answer	Rectification/cancellation proceedings can be used to seek changes or removal of a trademark record on legally recognised grounds, subject to the applicable procedure.

FAQ 18

Category	Trademark
Question	Can a trademark be renewed?
Answer	Yes. Registered trademarks can be renewed subject to the applicable statutory period, fees and procedure. Renewal should be planned before expiry.

FAQ 19

Category	Trademark
Question	Can trademark ownership be transferred?
Answer	Trademark assignment/ownership-transfer support is included. The exact documentation and recordal requirements depend on the transaction and applicable rules.

FAQ 20

Category	Trademark
Question	Can a trademark be licensed?
Answer	Yes. Trademark licensing/registered-user support is included in the expanded knowledge base. The licence terms and recordal requirements depend on the arrangement.

FAQ 21

Category	Trademark
Question	What is a trademark search?
Answer	A trademark search checks relevant records for potentially identical or similar marks before filing or adoption, helping identify conflict risks.

FAQ 22

Category	Trademark
Question	What is a trademark class?
Answer	A trademark class categorizes goods/services for which protection is sought. The correct classes depend on the client's actual and intended business activities.

FAQ 23

Category	Trademark
Question	What is an international trademark registration?
Answer	The Madrid Protocol provides a route for eligible applicants to seek protection in designated jurisdictions through the international system, subject to the underlying Indian basic mark and each jurisdiction's rules.

FAQ 24

Category	Trademark
Question	What is a well-known trademark?
Answer	A well-known trademark is a mark that can qualify for special recognition based on substantial reputation and recognition under applicable law. Evidence is important and the outcome is authority-dependent.

FAQ 25

Category	Copyright
Question	What can be registered as copyright?
Answer	The knowledge base covers literary, artistic, musical, software and other eligible copyrightable works, subject to the applicable copyright law.

FAQ 26

Category	Copyright
Question	What documents are needed for copyright registration?
Answer	Typical documents include applicant details, the work file, declarations/authorization, identity/address proof and assignment/NOC documents where relevant.

FAQ 27

Category	Copyright
Question	How does copyright registration work?
Answer	A typical process is preparing the application and work, uploading documents, paying the applicable fee, obtaining the diary number and monitoring for objections/hearing/status.

FAQ 28

Category	Copyright
Question	What is copyright assignment?
Answer	Copyright assignment is a transfer of relevant copyright rights from one party to another under an appropriate agreement and applicable law.

FAQ 29

Category	Patent
Question	What is a patent?
Answer	A patent protects qualifying inventions subject to statutory requirements such as novelty, inventive step and industrial applicability.

FAQ 30

Category	Patent
Question	What documents are needed for a patent filing?
Answer	Typical documents include inventor/applicant details, invention disclosure/specification, drawings where applicable, priority documents where claimed and required declarations/forms.

FAQ 31

Category	Patent
Question	What is a patent prior-art search?
Answer	It is research into existing patents and technical disclosures to identify relevant prior art and help assess patentability or filing risks.

FAQ 32

Category	Patent
Question	What is a provisional patent application?
Answer	A provisional application can be used to establish an early filing priority where appropriate. Further statutory steps are required after provisional filing.

FAQ 33

Category	Patent
Question	What is PCT filing?
Answer	PCT filing is an international patent filing route that can simplify the process of seeking protection across multiple jurisdictions, followed by country-specific national/regional phases.

FAQ 34

Category	Design
Question	What is design registration?
Answer	Design registration protects a qualifying new/original visual design applied to an article, subject to statutory requirements.

FAQ 35

Category	Design
Question	What documents are needed for design registration?
Answer	Typical documents include applicant details, design drawings/photos/representations, article name, Locarno class, priority details if claimed and authorization where applicable.

FAQ 36

Category	IP
Question	What is IP monitoring?
Answer	IP monitoring tracks relevant trademark/IP records, journals and deadlines to identify potentially conflicting filings or important events.

FAQ 37

Category	IP
Question	Why should a business monitor its trademark?
Answer	Monitoring can help a brand owner identify potentially conflicting filings or relevant registry events early enough to consider an appropriate response.

FAQ 38

Category	IP
Question	What is an IP portfolio audit?
Answer	An IP portfolio audit reviews existing IP assets, applications, ownership documents, renewals and gaps to create an organized protection and deadline plan.

FAQ 39

Category	ISO
Question	What is ISO 9001?
Answer	ISO 9001 is a quality-management-system certification framework focused on consistent processes, customer requirements and continual improvement.

FAQ 40

Category	ISO
Question	What is ISO 27001?
Answer	ISO 27001 is an information-security management-system standard covering information-security risks, controls and continual improvement.

FAQ 41

Category	ISO
Question	What is ISO 22000?
Answer	ISO 22000 is a food-safety management-system certification framework for organizations across the food chain within the applicable scope.

FAQ 42

Category	ISO
Question	What is ISO 45001?
Answer	ISO 45001 is an occupational health and safety management-system framework for managing workplace risks and improving safety performance.

FAQ 43

Category	ISO
Question	What is ISO 14001?
Answer	ISO 14001 is an environmental management-system framework focused on environmental aspects, compliance obligations and continual improvement.

FAQ 44

Category	ISO
Question	What is ISO 13485?
Answer	ISO 13485 is a quality-management framework tailored to medical-device organizations and applicable regulatory requirements.

FAQ 45

Category	ISO
Question	What is GMP certification?
Answer	GMP certification support focuses on controlled manufacturing quality, hygiene and production practices under the applicable GMP scheme.

FAQ 46

Category	FSSAI
Question	What is FSSAI registration/license?
Answer	It is food-business registration/licensing under India's food-safety framework, with the applicable category depending on the food business activity and scale.

FAQ 47

Category	FSSAI
Question	Who needs FSSAI?
Answer	Covered food businesses can include manufacturers, processors, traders, distributors, retailers, restaurants and other food operators, subject to the applicable category.

FAQ 48

Category	FSSAI
Question	What documents are needed for FSSAI?
Answer	Typical documents include identity/address proof, premises proof, business constitution details, photographs and activity-specific documents such as layout, equipment or product details where applicable.

FAQ 49

Category	FSSAI
Question	How long does FSSAI take?
Answer	The uploaded guide states that FSSAI licensing guidance may allow issuance within 60 days from the application ID for a complete licence application; actual cases can vary and registration has different requirements/timelines.

FAQ 50

Category	Business
Question	What is GST registration?
Answer	GST registration is the process of obtaining GST registration for persons/businesses who are required or eligible to register under applicable GST rules.

FAQ 51

Category	Business
Question	What is IEC?
Answer	IEC means Importer Exporter Code. It is the relevant DGFT identifier for import/export activities subject to applicable rules and exemptions.

FAQ 52

Category	Business
Question	What is Udyam/MSME registration?
Answer	Udyam registration is the official registration framework for eligible micro, small and medium enterprises under the applicable MSME classification rules.

FAQ 53

Category	Business
Question	What is company incorporation?
Answer	Company incorporation is the formal process of establishing a company through the applicable corporate-registration process, including required forms and constitutional documents.

FAQ 54

Category	Business
Question	What is LLP registration?
Answer	LLP incorporation establishes a Limited Liability Partnership through the applicable registration process and documentation.

FAQ 55

Category	Business
Question	What is partnership firm registration?
Answer	It is registration/documentation support for an eligible partnership firm under applicable state rules.

FAQ 56

Category	Business
Question	What is barcode registration?
Answer	Barcode/GS1 registration provides standardized product identifiers used in retail, distribution and supply-chain systems.

FAQ 57

Category	Business
Question	What is DSC?
Answer	A Digital Signature Certificate is an electronic signature credential used for certain online government/business filings and authentication.

FAQ 58

Category	Business
Question	What is Shop & Establishment registration?
Answer	It is a state-level registration/compliance framework that may apply to eligible commercial establishments, depending on the state and business circumstances.

FAQ 59

Category	Business
Question	Can CopyHart help with ITR?
Answer	Income-tax/ITR support is included in the expanded knowledge base for eligible individuals and businesses, subject to the applicable return type and tax rules.

FAQ 60

Category	Business
Question	Can CopyHart help with accounting?
Answer	Accounting and bookkeeping support is included as a business-service knowledge-base entry, covering organization of invoices, bills, bank statements and transaction records subject to the engagement scope.

FAQ 61

Category	Digital
Question	Can CopyHart design a logo?
Answer	Yes. Logo Design and Making is included and covers concept development, revisions and final vector/raster assets according to the agreed scope.

FAQ 62

Category	Digital
Question	Can CopyHart build a website?
Answer	Yes. Custom Websites & SEO is included for businesses and organizations needing a new or improved online presence.

FAQ 63

Category	Digital
Question	Does CopyHart provide SEO?
Answer	Yes. The website service entry includes technical/on-page SEO, analytics and ongoing optimization activities.

FAQ 64

Category	Digital
Question	Can CopyHart help with branding?
Answer	Yes. Brand Development & Marketing is included for brand strategy, positioning, visual consistency, content/campaign setup and related marketing work.

FAQ 65

Category	Cross-sell
Question	I am starting a new business. What should I check first?
Answer	Start with the business structure and activity, then map applicable registrations/compliance such as GST, Udyam, Shop & Establishment, FSSAI, IEC or sector-specific registrations, plus IP protection and contracts where relevant.

FAQ 66

Category	Cross-sell
Question	I am launching a new brand. What should I consider?
Answer	Consider trademark clearance/class selection and trademark registration, plus logo/brand identity and domain registration. Additional registrations depend on the business activity.

FAQ 67

Category	Cross-sell
Question	I run a food business. What services may be relevant?
Answer	FSSAI licensing/registration is a key starting point. Depending on the business, other registrations, food-safety systems, certifications, GST and business/IP services may also be relevant.

FAQ 68

Category	Cross-sell
Question	I want to export products. What should I consider?
Answer	Depending on the product and trade model, check IEC, APEDA or Spices Board applicability, product-specific certifications such as BIS where relevant, and trademark/IP protection.

FAQ 69

Category	Cross-sell
Question	What documents should I send first?
Answer	Start with a short description of the business/service required, applicant/entity details, relevant registration numbers and the documents already available. The exact checklist should then be customized to the service.

FAQ 70

Category	Chatbot
Question	Can the chatbot guarantee a government approval date?
Answer	No. Government/third-party timelines depend on authority processing, document completeness, examination, inspection, objections, hearings and other case-specific events. The knowledge base should provide indicative timelines only.

FAQ 71

Category	Chatbot
Question	Can the chatbot give legal advice?
Answer	It should provide general service information and process guidance from the knowledge base, not present itself as a substitute for professional legal advice or guarantee an outcome.

FAQ 72

Category	Chatbot
Question	What if I only know the problem, not the service name?
Answer	The chatbot should identify the likely intent from the user's problem, ask a short clarifying question if needed, and map the request to relevant CopyHart services.

FAQ 73

Category	Chatbot
Question	What if a service is not on CopyHart's current website?
Answer	The chatbot should not claim current availability merely because the service exists in this expanded knowledge base. It should say that the service appears in the internal knowledge base and recommend confirming current availability/scope before commitment.

5. Source / Verification Notes

The original uploaded reference guide remains the primary basis for the original service catalogue and explicitly warns that official requirements and timelines can change. [filecite]turn0file0[L356-L377]

Website-derived content in this add-on is intentionally limited to the official site's publicly indexed positioning as a "One-Stop Business Platform." The website did not expose a reliably indexed, complete About Us/FAQ text during this research pass, so this document does not present invented website quotations as factual website content.

External government/authority references used in the broader knowledge-base expansion include IP India, FSSAI, Udyam, DGFT, GST and MCA materials. Authority-specific requirements should always be rechecked before a final client-facing commitment.
